

Farm Plan Invoice Detail

Last Modified on 01/27/2022 11:12 am CST

When using the Farm Plan Payment Method, there are a few reasons Invoice Detail may not be sent to John Deere.

1. The payment was only a partial payment. The Farm Plan interface does not send invoice detail with partial payments since there is no way to know which line items are being paid.
2. The Farm Plan interface also doesn't send invoice detail when the payment includes multiple invoices. There is no way to indicate to John Deere that multiple invoices are being sent, so the detail would appear to be part of a single invoice.
3. The invoice being sent may have a partially prepaid line item.
