

Grower360 Native App

Last Modified on 05/24/2023 4:03 pm CDT

The Grower360 Native App allows you to provide a Grower360 app, completely branded with your company information and available to download in both the Apple Store and Google Play.

Access to the Grower360 Native App is an additional purchase from SSI. Please contact us at sales@agvance.net for more information.

For setup steps, see [Native App Setup for Android](#) and/or [Native App Setup for iOS](#).

Requirements

Creating a branded app for download in the Apple Store and Google Play requires the following:

Apple

- **Developer Accounts in Apple Store & Google Play** – Developer accounts are required in order to brand and promote the Grower360 app in the Apple Store and Google Play for your customers. The process involved to enroll for the developer accounts may take several days for both Apple and Google to verify and approve the enrollment application.

Note: Apple Developer Account – \$100/year

- **Valid Email Address** – This email address will be the account managing the developer accounts. It is recommended to create an email account that is separate from an individual's company email account.
- **D-U-N-S Number** – This is required for the Apple Developer Account.
- **Legal Entity Status** – This is required for the Apple Developer Account.
- **Binding Authority to Enroll** – This is a required item for the Apple Developer Account.
- **Company Website** – While entering a website is optional, if a URL is entered, it must be publicly available and the domain must be associated with your organization.

Google

- **Developer Accounts in Google Play** – Developer accounts are required in order to brand and promote the Grower360 app in Google Play for your customers. The process involved to enroll for the developer accounts may take several days for both Apple and Google to verify and approve the enrollment application.

Note: Google Developer Account – \$25

- **Valid Email Address** – This email address will be the account managing the developer accounts. It is recommended to create an email account that is separate from an individual's company email account.
- **Company Website** – While entering a website is optional, if a URL is entered, it must be publicly available and the domain must be associated with your organization.
