

Dispatch Management - SKY Admin

Last Modified on 02/21/2024 1:30 pm CST

Integrations Setup

Select the **Edit** icon to enter a *DriftWatch API Key* to display sensitive crop information alongside field boundaries on maps in SKY Dispatch and Apply.

Additionally, a *Navman Username* and *Navman Password* can be entered to tie vehicles in SKY Dispatch to a Navman device. Select the **Trash Can** next to saved credentials to remove them.

Location Preference Setup

In the *Location Preference Setup* section, the Location selected in the *Search Locations* drop-down will be the one affected when turning preferences on or off.

The *Show Product Detail in Grower Notification Emails* option is defaulted to off for each location.

With this option turned on, the email sent will include estimated Product totals and Product details.
