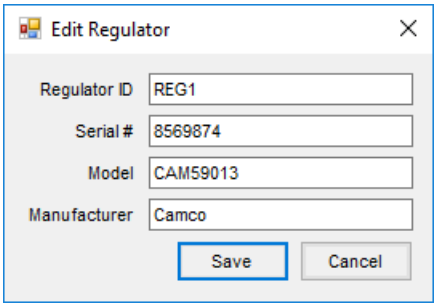
Regulators

Last Modified on 01/25/2024 11:52 am CST

Navigate to *Energy / Setup / Regulators*.



- **Regulator ID** – This is a unique number among all regulators. If the regulator has a unique serial number, enter it here. Otherwise, use the customer ID of the tank where the regulator is assigned. If the customer has multiple tanks or two regulators on a tank, then use the Customer ID followed by a *-1*, *-2*, etc.
- **Serial #** – This number is not required to be unique. If the regulator has a serial number, use that number. If not, a date stamp may be used. Even a combination of these two could be used.
- **Model** – This is the model number of the regulator. An example may be*Single Phase*, *Dual Phase*, etc.
- **Manufacturer** – This is the name of the manufacturer.
