

Purge Scale Tickets

Last Modified on 01/31/2024 3:52 pm CST

If a Scale Ticket has been transferred, it may be deleted out of the list of Scale Tickets at *Grain Scale Interface / Operations / Purge Tickets*.

- **Purge All Transferred Tickets** – Select to delete all Scale Tickets that have been transferred.
- **Purge Through** – This option is available when *Purge All Transferred Tickets* is not selected. Enter a date to delete all tickets created through the specified date regardless of their *Transferred* or *Untransferred* status. The default date is the current date.
- **Purge** – Select this to purge the Scale Tickets. A message displays showing how many Scale Tickets will be purged and gives an option to continue with the purge process.

How to Purge Scale Tickets

1. Go to *Operations / Purge Tickets*.
2. Determine if the transferred Scale Tickets will be purged through a specified date or if all transferred Scale Tickets will be purged.
3. Select **Purge**.
