

Multi-Shrink Closed Contracts and Ticket Detail Dashboard

Last Modified on 12/05/2022 1:23 pm CST

Purpose

This dashboard displays closed contracts on Scale Tickets in the selected Scale Ticket date range to assist in defining what contracts are available to be settled.

Details

This is only visible when the data is set up to be multiple shrinking based upon dispositions. If the database is not set for Multiple Shrink, no results will be displayed regardless of the number of contracts and tickets entered.

The filters for this dashboard are based primarily on the Scale Ticket split level with the choice of Grade Factors to show the averages. The *All Scale Tickets* section displays all Scale Tickets in the delivery period regardless of contract relationships.

If a contract number is selected, the *Scale Tickets on Contract* section will display all tickets applied to the contract with the number of *Net Units (Settled Units) [Grade Avg]*.

Dashboard honors user restrictions based on customer location.
