Acres Applied Dashboard

Purpose

The *Acres Applied* tab gives the total acres by Location, Job Type, Applicator, Vehicle, Salesman, and Product for Blend Tickets that have been completed from Agvance Ops.

The second tab (*Acres by Status*) shows the acres that have not been invoiced that are *Ready*, *In Progress*, or *On Hold*.

Details

Voided Blend Tickets are not included. Selecting a Job Type, Applicator, Vehicle, Salesperson, and/or Product will filter the dashboard.

Acres are based on Applicator acres from the Blend Ticket's *Additional Info* tab.

Filtering options include:

- From/To dates
- Location ID
- Loaded/Unloaded
- Custom Applied Only?
- Date Selection
    - **Completed** – Date timestamp from Agvance Ops and the Blend Ticket must be completed in Agvance Ops or Dispatch. All fields must be completed on multi-Field tickets for acres to be included in this dashboard.
    - **Ordered** – Blend Ticket date
    - **Loaded** – Loaded date
    - **Invoice** – Invoice date and information displayed on the dashboard comes from Invoices, not Blend Tickets.
