

Changing Default Number of Acres on Blend Ticket or Plan/Sales Order

Last Modified on 12/21/2022 8:58 am CST

Q. How is it possible for a different number of acres for a field to default into the Blend Ticket or Plan/Sales Order?

A. The number of acres is stored in the Field file. If the default needs changed, it can be done at *Hub / File / Open / Fields*. From there, select the appropriate Field and edit the number of acres on the *Profile* tab.
