

Grain Divisors

Last Modified on 12/21/2022 9:00 am CST

Q. When setting up products such as corn, soybeans, wheat, and milo, what are the units of measure?

A. All grains will be set up in hundredweights or bushels (cwt or bu). If using hundredweights, there are always 100 lbs/cwt.

If entering quantity in bushels, the following applies:

corn/milo/grain sorghum = 56 lbs/bu

wheat/soybeans = 60 lbs/bu

oats = 40 lbs/bu

barley/rye = 48 lbs/bu
