New Product's Pricing Does Not Appear on Blend Ticket or Plan / Sales Order

Last Modified on 12/21/2022 9:04 am CST

Q. While adding a Blend Ticket, Field Plan, or Sales Order the price does not show up for a product just added.

A. A list price needs to be added for the product at *Accounting / File / Open / Products* or at *Hub / File / Open / Products*. If changing product pricing, any existing, quoted Blend Tickets, Field Plans, or Sales Orders made prior to the price change will not reflect the new pricing.
