

# SKY Application Report

Last Modified on 11/06/2024 9:10 am CST

The SKY Application Report helps reconcile purchased product to applied product by displaying the actual product applied with minimum and maximum rates, along with visual comparisons for yield or soil test data.

1. Navigate to *Reports / SKY Mapping* and select the option to run the *Sky Application Report*.

1. Select Report:

- Sky Application Report
- Sky Boundary Report
- Sky Crop Planning Report
- Sky Field Record Notebook
- Sky Field Reference List
- Sky Grower Summary - Application
- Sky Harvest Summary
- Sky Planting Report
- Sky Planting Summary
- Sky Recs Report - Application
- Sky Recs Report - Planting
- Sky Scouting Detail

2. Options:

\* Season: 2024

Start Date  End Date

\* Display Type: Coverage

\* Orientation: Portrait

\* Basemap: Imagery with Labels  Custom Imagery

\* Application Attribute: Product Mix  Original Format

**Create Report**

**Note:** Individual Events under each Field can also be selected for this report. Selecting multiple Events for multiple Customers will cause the report to display per Grower.

2. Choose the appropriate season from the *Season* drop-down under *Options*. This runs all Application Events for the chosen Field(s) per season selected.
3. Select the *Display Type* drop-down and choose from the following:
  - o **Coverage** – This displays results as a coverage type map.
  - o **Point** – This displays results based on point data.
  - o **Polygon** – Results display by polygon.
4. Select the desired Basemap imagery from the *Basemap* drop-down menu.
5. Once all desired report criteria is selected, choose **Create Report**.
6. The report displays in the *Reports Based on Field Selection* grid with a status of *In Progress*. When the report has been generated, choose **View Report** to open the report.

**Note:** With the report open, choose from multiple report tools on the left to *Download*, *Print*, or make additional markups/adjustments to the report.
