

# CNS Program Lists a Single Lien Multiple Times

Last Modified on 12/21/2022 1:31 pm CST

**Q. CNS program (Central Notification System) - I am seeing a lien for a farmer listed several times when it only needs to be listed once. Why is this duplicated?**

A. The CNS sends out an update disk periodically. Along with the update disk they send a complete list of liens. You should only load out the update disk each time they arrive. If you load them all out you will get duplicates in your lienholders list.

If you have duplicates please contact support for assistance in cleaning these up.
