

Entering Vehicle Information on Grain Scale Tickets

Last Modified on 03/21/2025 7:48 am CDT

The following describes the setup steps for entering Customer truck/vehicle information into Agvance. The vehicle description, license tag number, and number of axles will then be available to select when adding or editing a ticket in Grain Scale Interface. This information will be printed on each ticket.

1. Edit the Customer at *Hub / File / Open / Customers*.
2. Select **Contacts** at the bottom of the window.

The screenshot shows the 'Edit A Customer - AndBa Barry Anderson' window. The 'Profile' tab is active, and the 'Grain Information' sub-tab is selected. The window contains several input fields and a table.

Customer Information:

- AGIS ID: AndBa
- Location: 00MAIN
- First Name: Barry
- Last Name: Anderson
- Address 2: 2220 N 1000 Rd E
- City: Assumption
- State: OR
- Zip: 62510
- Phone 1: 217-226-2332
- Phone 2: 217-226-1256
- Territory: Farbre
- Notes: Note
- Latitude: 39494470
- Longitude: -89114660
- Preferred Language: English
- GLN: 2345678901234

Customer ID Cross Reference Table:

MeppelID	MeppResale	ResellerID	Cross Ref4	Energy-Force ID
				8525436854

Federal Permits Table:

Federal Permits	Exp.Date	<Ca

2		
3		
4		
5		

Buttons: Attachments, Classifications, Attributes, Active Patron, Birth Date, SSN/Tax ID, Dept. Overrides, Sales. Overrides, Link Agrian Growers, Refresh, Influences, Tech Lic #s, State Permits, Contacts, Addresses, Save, Cancel.

3. Enter the license number of the vehicle in the *Name* column. This information will appear in the *Vehicle ID* field on the ticket in Grain Scale Interface. Up to 20 characters will display and print on the ticket. Do not enter more than a 20-character description for the license number.

	Name	Contact Type	Address 1	Address 2
1	License#	Vehicle	Red truck with white lettering	5
2				
3				
4				
5				
6				
7				
8				

4. Enter a short description such as *Vehicle* in the *Contact Type* column. What is entered here **MUST** also be entered as the *Contact Type* for all other vehicles entered for this Customer and all other Customers. This will not have to be typed in again after it has been entered once. It will be available from the drop-down. Other Users entering information should be instructed to select this *Contact Type*. This is just an identifier and is used only for setup purposes in Grain Scale Interface.
5. In the *Address 1* column, enter a description of the vehicle (i.e. *Red truck with white lettering*). This description will help recognize and select the right vehicle for this Customer when in Grain Scale Interface. Do not enter more than 50 characters in this field.
6. In the *Address 2* column, enter the number of axles for this vehicle. Even though more characters are allowed, only the first two are recognized in Grain Scale Interface in the *Axle* field.
7. To add additional vehicles/information for a Customer, repeat Steps 3 - 6 until all vehicles have been entered for that Customer. Enter only one vehicle per line. Once all vehicles for this Customer have been entered, choose **Done** and **Save**.
8. Continue selecting Customers, repeating Steps 2 - 7 until all vehicles for all Customers have been entered. For company trucks, add the company as a Customer and enter all company vehicle information for each company truck as well.

Using Vehicle Information on Grain Scale Tickets

Go to *Grain Scale Interface / Setup / Configure Scale Interface*. Choose the description entered as the *Contact Type* in Step 4 above from the *Customer Contact Type for Vehicle* drop-down.

Results

When adding or editing tickets in Grain Scale Interface, double-click in the *Vehicle ID* field and select from a list of vehicles associated with the Customer on that Scale Ticket. Only vehicles for that Customer will be available for selection. Once a vehicle is selected, the license number will appear in the *Vehicle ID* field, and the number of axles will automatically appear in the *Axle* field on the ticket. This information will print on the Scale Ticket.
