

# Alternate GLN Setup

Last Modified on 03/11/2022 12:12 pm CST

An alternate location GLN may be used when utilizing 'Hub' ordering for Crop Protection Products or when there is a conflict with GLNs between vendors.

## Setup

To add alternate GLNs, open the B2B icon and navigate to *Setup / eBusiness*. The Locations grid includes columns titled *Alt. Code Type* and *Alt. Value*. Using the chart below as reference, determine the GLN each vendor expects for each type of message. For those messages using the alternate GLN, enter the appropriate information in the *Alt Value* column with the *Alt Code Type* containing the same information as the *Code Type*.

Vendor	Message	Send Primary (Sold To)	Send Alternate (Ship To)
Winfield	Purchase Orders		X
Bayer & Winfield	EDNs		X
Winfield	Cost Sheet		X
Bayer	Grower Orders	X	
Winfield	Grower Orders	X (Hub GLN)	X if no Hub Ordering
Bayer	Price Sheet	X	
Winfield	Price Sheet	X (Hub GLN)	X if no Hub Ordering

Once the eBusiness Setup is complete, for each message type, mark the vendor line to send the Alt GLN Code as applicable.

Use Alt. Location Code
<input type="checkbox"/>
<input type="checkbox"/>
<input type="checkbox"/>
