

Canada Fertilizer Tags - MB

Last Modified on 09/10/2024 8:23 am CDT

Create and print State Fertilizer Tags from Agvance that detail a fertilizer blend's analysis and overall nutrient content.

Setup

Calculate and display nutrients on the State Fertilizer Tag.

1. At *Hub / File / Product*, open the desired Product in Agvance and navigate to the *Blend Setup* tab to enter the Product's *Nutrient Contributor Information*, *Chemical Composition*, and *Fertilizer Ingredients*. Ammonium Thiosulfate is used in this example.
2. Enter the Product's fertilizer analysis in the *Nutrient Contributor Information* section.
3. Select **Details** to access the *Chemical Composition* window and set nutrient values.

The screenshot shows the 'Blend Setup' tab in the software. Under the 'Nutrient Contributor Information' section, the following values are entered: N: 12, S: 26. The 'Details' button is highlighted with an orange box.

Example: For Ammonium Thiosulfate, enter values on the N and S tabs.

The screenshot shows the 'Chemical Composition' window for Nitrogen (N). The 'Ammoniacal N' field is highlighted with an orange box and set to 100. Other fields for Nitrate N, Other / Water Soluble N, Urea N, Water Insoluble N, and Total Slow Release N are all set to 0.

The screenshot shows the 'Chemical Composition' window for Sulphur (S). The '% Combined Sulphur' field is highlighted with an orange box and set to 100. The '% Free Sulphur' field is set to 0.

Note: The numbers listed in these columns are percentages and must sum to 100 for each respective nutrient.

4. Select **OK** to save the Chemical Composition.
5. On the *Blend Setup* tab, enter the Product's *Fertilizer Ingredients* information. Enter an ingredient name in each row and check the box to the right to designate which nutrient is supplied by that ingredient. For this

example, Ammonium Thiosulfate's nitrogen is derived from Anhydrous Ammonia and the sulfur is derived from Elemental Sulfur.

| | Fertilizer Ingredients | N | P | K | S |
|---|------------------------|-------------------------------------|--------------------------|--------------------------|-------------------------------------|
| 1 | Anhydrous Ammonia | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 2 | Elemental Sulfur | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| 3 | | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

- Choose **Save**.
- Navigate to *Blending / Setup / Location Preferences* and select the *Print Prefs* tab to set up the desired *Guaranteed Analysis Decimal Accuracy*.

The screenshot shows the 'Blending/Planning Preferences' window for location '00MAIN'. The 'Print Prefs' tab is selected. A sub-window titled 'Guaranteed Analysis Decimal Accuracy' is open, displaying the following table:

| | Accuracy | Tolerance |
|----|-----------|-----------|
| N | Whole | .5 |
| P | Whole | .5 |
| K | Whole | .5 |
| S | Whole | 0 |
| Ca | Whole | 0 |
| Mg | Whole | 0 |
| Zn | Hundredth | 0 |
| Fe | Hundredth | 0 |
| Mn | Hundredth | 0 |

- Optionally utilize the *State Fertilizer Tag* section. To review the fertilizer ingredient values before printing the State Fertilizer Tags, check the *Review Tag Numbers* checkbox in the *State Fertilizer Tag* section.
- Once the desired information, analysis, and tolerances are set, select **Save**.

Printing the State Fertilizer Tag

- Create a Blend Ticket in Blending.
- When printing the Blend Ticket, check the *Print State Fertilizer Tag*, *Print Blend Ticket Number*, and *Print* options in the *State Fertilizer Tag Options* section. Select **OK**.
