Purpose

The Price Level dashboard gives the ability to see what Price Levels were used on Invoices to make sure the selling product is at the appropriate price.

Details

This dashboard honors user restrictions based on login location. View specifics at the Invoice number level. Filter by *Invoice Location*, *Product*, *Invoice Date*, and *Customer*.

Note: The price can be overwritten manually. Therefore, the dashboard would give the Price Level number, but the actual price may not match that Price Level number.
