

Futures Month Pricing - Agvance SKY Grain

Last Modified on 07/08/2026 8:04 am CDT

The *Futures Month Pricing* tab under *Futures* in Agvance SKY Grain can be used to review and set up Futures Months/Pricing.

Note: Futures Month Pricing is only available to those who have the permission enabled in Agvance SKY Admin.

Filtering

Under the *Filtering* section, set the criteria to narrow down the items displaying in the grid below. Once filters are set, select **Apply Filters**. **Clear All Filters** can be selected to reset the filters selected.

If using Grower360, the cash bid visibility can be determined with the *Visible in Grower360* checkbox.

Note: The company must be using Barchart and not DTN for this functionality.

New lines can be added to this grid by selecting **+ Add Row** then double-clicking in a cell to enter *Edit* mode. Once all information has been added, select **Done**.

Right-Click Options

Some right-click options are available within the grid.

Alternatively, choose **Import Information**. A window displays where one .txt file can be dragged and dropped or choose browse to find the text file. Select **Import** to upload the information to the grid. Be sure to review the data for accuracy.

A *History Record* date can be set to create a record upon selecting **Save**.

When finished making changes, select **Save** in the bottom right.
