

# December 2024 SKY Release Notes

Last Modified on 12/31/2024 2:42 pm CST

---

## Admin

- **GRAIN-475 / Grower360 Setup Page** – The [Grower360 Setup](#) area in SKY Admin has been updated to be more consolidated.

## Analytics

- **AN-3246 / Vendor Autofill Dashboard** – The new [Vendor - Autofill](#) dashboard under *Admin* shows the number of pages scanned by User and includes additional details.

## Customer

- **SKYW-3241 / Customer Search** – [Searching for SKY Customers](#) has been upgraded to a grid format similar to other areas in SKY. Use the *Search By* options under the *Filters* menu to determine how the search functions.

## Energy

- **SKYR-610 / Tank History Tab** – A *Tank History* tab has been added to the *Tank Information* page. View that particular tank's Product Delivery Order history including the *Ticket Number, Call In Date, Due Date, Status, Order Type, Route* detail and *Region*. The most recent 10 will load initially with the option to view more and filter down within the grid.
- **SKYR-626 / Tank List Load and Search/Filter** – For larger tank lists, initial view of the *Tanks* page was not populating a list until a search was conducted. The first 500 tanks will now load by default, allowing users to see data right away in the grid.  
**Note:** Search actions will search the entire database of tanks. However, filtering and sorting the grid will only filter and sort the grid data which may not be the entire database of tanks. For example, the initial load instance would filter and sort the 500 tanks only until a Search is conducted to further refine the results. Searching does search across all grid inputs.
- **SKYR-632 / Logo on Daily Fuel** – The logo is no longer visible on the *Daily Fuel* page to make room for future additions.

# Mapping

## Version 4.24

### Web

- **HW-11269, 11330 / Field Reference List for Report Books** – The Field Reference List has been enabled as an option in Report Books.
- **HW-11521 / Recs Equipment Option** – A new *Equipment* section has been added below the *People* section of the *General* tab for all four Rec types. This section supports adding and deleting multiple Equipment entries from the Rec and has the *Find Equipment* auto-complete input similar to Events. Details are displayed for the added Equipment when hovering that include the *Parent Equipment Type*, *Equipment Type*, *Equipment Name*, *Owner/Operator*, and *Monitor ID*.
- **HW-11551 / Import Coverage Events Surfacing** – Performance improvements were made for coverage Events (Application, Harvest, Planting, and EC Data) to greatly improve the performance and speed (especially on Fields over 200 acres in size).
- **HW-11564 / Data Exchange Onsite Climate Connection** – With the Onsite Climate Connection, the Data Exchange no longer requests the same files redundantly within a short timeframe.
- **HW-11622 / Import Boundary Larger Uploads** – Large Field Boundary imports work as expected.
- **HW-11643 / Import Events Files Info Season Change** – For all Imported Events, changing the Season updates all Features/Points for that Season as expected.
- **HW-11665 / Layers Reports Print Layer** – The Print Layer and Split Screen Compare Print report will support the first soil sampling depth for surfacing, labels, and the results average table pending ongoing development.
- **HW-11693 / Import Planting** – Importing Planting when merging with an existing Event works as expected.
- **HW-11694 / Reports Merge Selected** – The *Merge Selected* reports feature works as expected.
- **HW-11700 / Import Events Fields** – The *Event Import* wizard and **Save** function work as expected.

### Mobile

- **HW-9816 / Sampling Grid Point Placement** – The grid point placement on multipart Fields works as expected.
- **HW-11602 / Sampling Event IDs** – Improvements have been made to reduce the number of Event IDs per User guid/device.
- **HW-11603 / Field Label Overlap** – Scale-dependent label placement and removal was implemented when zooming in and out.
- **HW-11756 / RTK Field Boundaries** – Editing RTK Field boundaries works as expected.

## Order

- **SKYD-399 / Edit Deliveries** – Editing a Delivery Ticket has been revamped to match the layout when adding a Delivery Ticket.

## Vendor

- **SV-9 / Autofill AP Bills** – AP Bill drafts can be created by uploading a PDF, PNG, JPEG, or JPG file in SKY Vendor. For more information on this feature, see [here](#).
