

# Introducing Agvance Ops

Last Modified on 03/13/2025 3:40 pm CDT

## New Mobile App Available: Agvance Ops

Agvance Ops is a new mobile application for Applicators and Delivery Drivers to view and complete their work assigned from SKY Dispatch. This new app will be a replacement for Apply and presents the same look and workflow.

Agvance Ops can be downloaded and used now, but the Apply app is still available if any issues arise. At any time, the user can close Ops, log in to Apply, and pick-up where they left off to continue their work.

This new app is starting as a replacement for Apply with the same capabilities but allows SSI to provide new functionality and features, improving user experience and introducing new tools in the future.

Agvance Ops can be found in the iOS App store and Google Play store and is readily available for phones and tablets.
