

Map - SKY Energy

Last Modified on 09/04/2025 11:02 am CDT

A visual of all tanks is available in SKY Energy. Enter a *City or Zip Code* in the *Select a Location* window and select **Set Default Location** to load map data.

This is the default location the map loads to when opening the *Map* tab, but can be changed by selecting the **Filters** button. Additionally, filter the view based on *Delivery Types* and select **Apply Filters** to see the results on the map.

In the bottom right corner are *Map Camera Controls* and a link to view *Keyboard Shortcuts* for navigating the map by mouse or keyboard.

Optionally check *Labels* under *Satellite* to show imagery with street names on the map and *Terrain* under *Map* to incorporate a representation of the Earth's surface elevation, creating a more realistic and detailed view.

Select a **Tank** icon on the Energy Map to see a more detailed card with the tank *Serial Number*, *Delivery/Tank type*, and *Customer Name*. Select the detail card to redirect to the Tank Information page in a new browser tab.

- If multiple tanks exist at the same address, the tanks will show with a stack indicator showing how many have the same location. Expand the information panel to show details for each tank at the location.
- If multiple tanks exist at a location, the tank icon will have a number indicating how many are at that location.

Click the icon and scroll to view the additional tanks on the list.

- Zoom out to see a larger map area with markers indicating the number of tanks in an area.
