

# 1.3.0 | 08.04.2025

Last Modified on 08/04/2025 9:29 am CDT

## Bug Fixes

- **SKYC-3769 / Non-Field Features** – Issues with displaying non-field features have been resolved. These features will now appear correctly on a job's *Overview Page* map as well as the *Full Page* map.
- **SKYC-3720 / Vehicle Search during Login** – All matching Vehicles are displayed when searching on the *Login* page.
- **SKYC-3768 / Job Reassignment** – Reassigning a job in Ops previously removed the job from the original primary Applicator's job list. Now, reassigning a job will demote the original primary Applicator to a secondary.
- **SKYC-3746 / Start/Complete Job Condition Issues** – Starting condition values will no longer be overwritten.
- **SKYC-3770 / Product Page Updates** – Units of Measure now display accurately throughout *Product* pages in Blend and Delivery jobs. The keyboard now properly activates when users initiate edits.
- **SKYC-3755 / Customer Phone Number on Job Card** – Grower phone numbers are now available within the *Job Information* panel on the *Overview* page, along with grower contact numbers, for direct calling.

## New Features

- **SKYC-3661 / Single Sign On** – Agvance Ops now supports SSO-enabled companies. Users will enter their email address followed by an SSO prompt or a traditional login option, depending on company configuration.
- **SKYC-2410 / Add/Upload Pictures to Delivery Job** – Drivers can now attach images to Delivery Tickets from the *Overview* page after a job has started. These images will display in Dispatch and in Job Completion emails to Growers.
- **SKYC-3666 / Application Zones Distinction** – Application Zones will remain green, while Non-Application Zones now include red hashing for clearer visual distinction
- **SKYC-3601 / Display SKY Mapping Boundary** – Fields with Mapping enabled will now display those boundaries within Agvance Ops.
