4.1.0 | 10.23.2025

Last Modified on 12/23/2025 3:01 pm CST

Bug Fixes

- **SKYC-3812 / Android Device View** – Spacing has been adjusted to accommodate Android screen elements such as buttons and the camera to ensure a cleaner display.
- **SKYC-3826 / Map Crashing** – An issue was identified where the map failed to display on specific iOS devices. The loading logic for maps and layers has been corrected.
- **SKYC-3834 / Missing Location ID** – The *Location ID* has been included in the location selection of filters to improve clarification.

Release Notes

- **SKYC-3804 / App Only Users Toggle** – The *App Only* toggle within Company Admin was not honored by Ionic Inform. Permissions have been corrected.
- **SKYC-3810 / Maps Layers** – A **Layers** button has been added to the Map View to give the ability to toggle between *Road* and *Satellite view*.
- **SKYC-3851 / Ticket Sorting Order** – The default sort order of Tickets has been updated to Ordered Date (descending), then Ticket # (descending), to match the previous version of Inform.
