

Dispatching Tender Drivers - SKY Dispatch

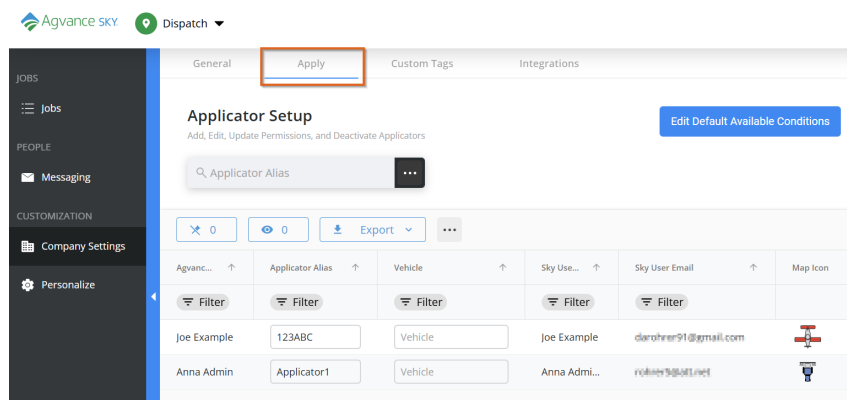

Last Modified on 12/03/2025 8:56 am CST

Overview/Company Settings

This enhancement introduces the ability for SKY Dispatch companies to schedule tender drivers either alongside the applicator assignment or independently. In addition, a dedicated Tender Driver view is now available in Agvance Ops, providing tender drivers with access to job and product information organized for tender workflow requirements.

Company Settings

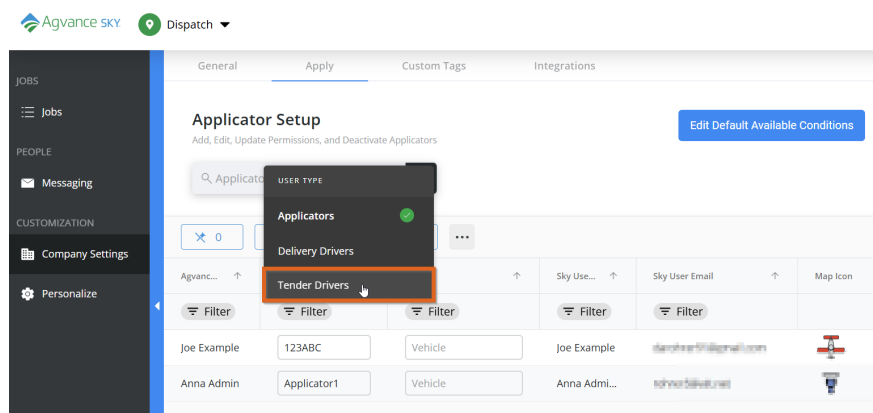

Within **Company Settings**, the configuration for tender related roles is found under the *Apply* tab.

Within **Applicator Setup**, select the ellipsis menu to access the **User Type** options.

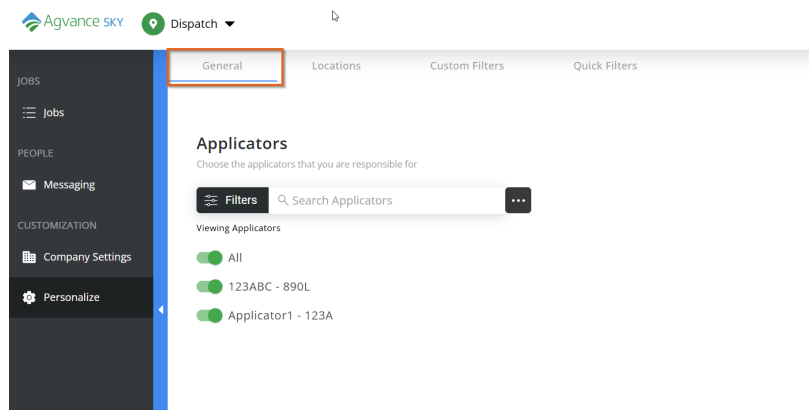

The available types now include:

- **Applicators**
- **Delivery Drivers**
- **Tender Drivers**

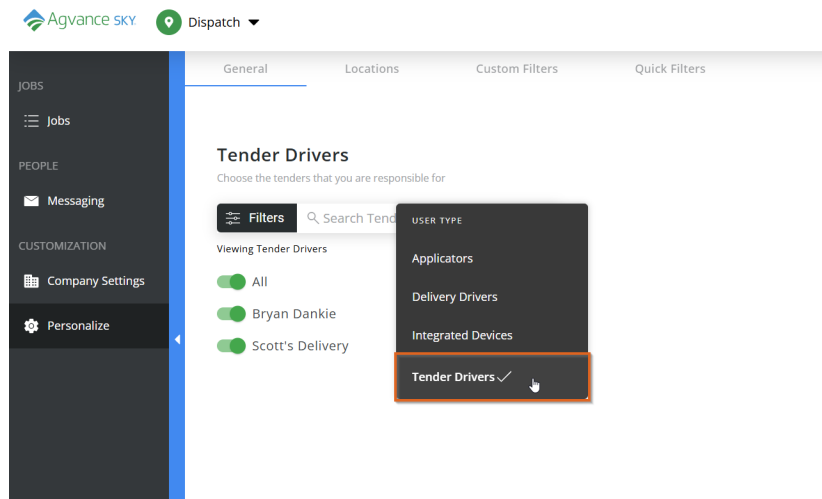

Personalize

Tender Driver visibility and related settings are located within the *General* tab of **Personalize**.

Within the *Applicators* field, select the ellipsis to open the **User Type** list.

Available types include:

- **Applicators**
- **Delivery Drivers**
- **Integrated Devices**
- **Tender Drivers**

Tender drivers must be enabled here to appear in assignment selections.

Toolbar Assignments

The toolbar allows for assignments to individual jobs or several jobs at once. When assigning to multiple jobs, all selected assignments, including the Primary assignee and Tender Drivers, are applied to each job unless an override message is displayed.

Product Totals

Dap (18-46-00)	11,730.000 Lbs
Potash (0-0-60)	6,747.000 Lbs
Ammonium Sulfate	22,074.000 Lbs

If a job already has an applicator assigned, then the following message will appear. Selecting **Assign Selected Jobs** will override any previous assignments.

These jobs already have an applicator assigned - this will override the previous assignments.

Assign Selected Jobs

Primary Assignee

When one or more jobs are selected, the assignment panel prompts for a **Primary assignee**. A primary applicator must be selected before tender assignment becomes available.

Tender Drivers

Once the Primary assignee is chosen, the **Select tender drivers** option is available. Selecting this opens a list of Tender Drivers configured for the SKY Dispatch company.

Tender driver assignment depends on the following configuration:

- Tender Drivers are set up in *Dispatch / Company Settings / Apply*.
- Tender Drivers are enabled in *Personalize / General*.

Note: A SKY account cannot be assigned as both an Applicator and a Tender Driver on the same job.

Schedules

Selecting **Schedules** in SKY Dispatch shows jobs by Applicator with the ability to reorder and reassign jobs.

Use the *Viewing* menu to switch between Blend and Delivery Tickets. Filter Applicators by using the *Filter Applicators* field. Optionally select the *Condense Job Details* toggle to view less or more job information.
