

Dispatching Tender Drivers - SKY Dispatch

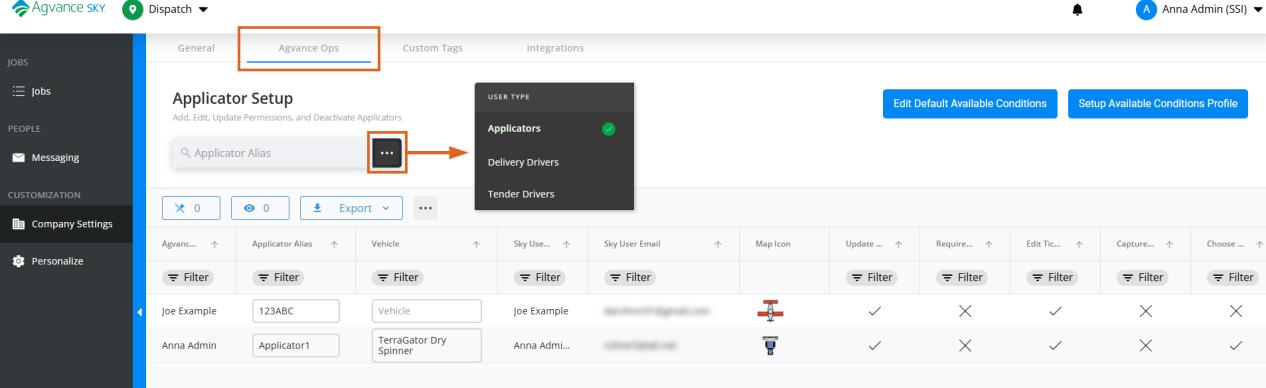

Last Modified on 01/19/2026 9:52 am CST

SKY Dispatch companies can schedule Tender Drivers either alongside the Applicator assignment or independently. In addition, a dedicated Tender Driver view is available in Agvance Ops, providing Tender Drivers with access to job and product information organized for tender workflow requirements.

Company Settings

Within *Company Settings*, the configuration for tender-related roles is found under the *Agvance Ops* tab.

Within *Applicator Setup*, select the **Ellipsis** menu to access the *User Type* options.

The screenshot shows the Agvance SKY Dispatch interface. The top navigation bar includes the Agvance SKY logo, a location icon, and the text "Dispatch". The top right corner shows a user profile for "Anna Admin (SS1)". The main menu on the left has sections for JOBS, PEOPLE, CUSTOMIZATION, and Company Settings, with "Company Settings" currently selected. The main content area is titled "Applicator Setup" with the sub-instruction "Add, Edit, Update Permissions, and Deactivate Applicators". A search bar for "Applicator Alias" is present. To the right is a "USER TYPE" dropdown menu with three options: "Applicators" (selected, indicated by a green checkmark), "Delivery Drivers", and "Tender Drivers". Below the dropdown are several filter buttons and a table showing user data. The table columns include "Applicator Alias", "Vehicle", "Sky User Email", "Map Icon", and various checkboxes for permissions like "Edit Default Available Conditions" and "Setup Available Conditions Profile".

The available types include:

- Applicators
- Delivery Drivers
- Tender Drivers

Personalize

Tender Driver visibility and related settings are located within the *General* tab of *Personalize*.

Within the *Applicators* field, select the **Ellipsis** to open the *User Type* list.

The screenshot shows the Agvance sky Dispatch interface. The left sidebar includes 'JOBS', 'PEOPLE', 'CUSTOMIZATION', and 'Personalize' sections. The top navigation bar has tabs for 'General' (highlighted with an orange box), 'Locations', 'Custom Filters', and 'Quick Filters'. A 'Dispatch' button is in the top right. The main content area is titled 'Tender Drivers' with a sub-instruction 'Choose the tenders that you are responsible for'. It features a 'Filters' bar with a search input 'Search Tender Drivers' and a '...' button. Below this is a 'Viewing Tender Drivers' section with a 'All' toggle and three user entries: 'Bryan Reynolds' and 'Scott's Delivery' (both enabled), and 'Tender Drivers' (disabled). To the right is a sidebar titled 'USER TYPE' listing 'Applicators', 'Delivery Drivers', 'Integrated Devices', and 'Tender Drivers' (with a checkmark). An orange arrow points from the '...' button in the filters bar to the 'Tender Drivers' section in the sidebar.

Available types include:

- Applicators
- Delivery Drivers
- Integrated Devices
- Tender Drivers

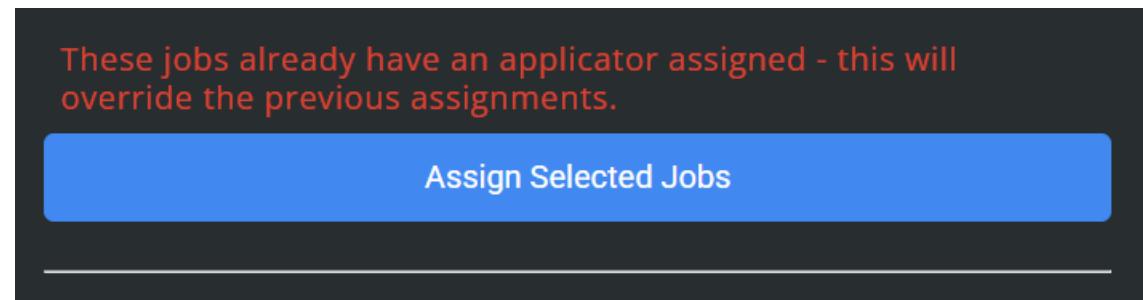

Tender Drivers must be enabled here to appear in assignment selections.

Toolbar Assignments

The toolbar allows for assignments to individual jobs or several jobs at once. When assigning to multiple jobs, all selected assignments, including the *Primary assignee* and *Tender Drivers*, are applied to each job unless an override message is displayed.

The screenshot shows the 'Jobs' list in the Agvance sky Dispatch interface. The left sidebar includes 'JOBS', 'PEOPLE', 'CUSTOMIZATION', and 'Personalize' sections. The main area displays a table of jobs with columns for 'Ticket N...', 'Customer', 'VRT', 'Crop', and 'Crop Ch...'. A toolbar above the table includes buttons for 'Primary assignee', 'Secondary assignees', 'Tender Drivers', and 'Assign Selected Jobs'. A message on the right states '45 jobs match your filter criteria | 1 jobs with 66.2 acres are selected'. The right sidebar shows 'Product Totals' for 'Dap (18-46-00)', 'Potash (0-0-60)', and 'Ammonium Sulfate'. An orange box highlights the 'Assign Selected Jobs' button.

If a job already has an Applicator assigned, the following message will appear. Selecting **Assign Selected Jobs** will override any previous assignments.

Primary Assignee

When one or more jobs are selected, the assignment panel prompts for a *Primary assignee*.

A primary Applicator must be selected before tender assignment becomes available.

	Ticket N...	Customer	VRT	Crop	Crop Ch...
<input type="checkbox"/>	203	Anderson, ...	X	--	--
<input checked="" type="checkbox"/>	205	Anderson, ...	X	--	--
<input type="checkbox"/>	220	Wheeler, G...	X	Soybeans	Roundup T...
<input type="checkbox"/>	221	Wheeler, G...	X	Soybeans	Roundup T...
<input type="checkbox"/>	222	Wheeler, G...	X	Soybeans	Roundup T...
<input type="checkbox"/>	224	Zuzzle, Sa...	X	Corn	--
<input type="checkbox"/>	225	Zuzzle, Sa...	X	Corn	--

Items per page: 50

45 jobs match your filter criteria | 1 jobs with 66.2 acres are selected

Primary assignee: Select an applicator

Secondary assignees: Select applicators

Tender Drivers: Select tender drivers

Assign Selected Jobs

Save Product Totals as PDF

Product Totals	
Dap (18-46-0)	11,730.000 Lbs
Potash (0-0-60)	6,747.000 Lbs
Ammonium Sulfate	22,074.000 Lbs

Tender Drivers

Once the *Primary assignee* is chosen, the *Select tender drivers* option is available. Selecting this opens a list of Tender Drivers configured for the SKY Dispatch company.

Tender Driver assignment depends on the following configuration:

- Tender Drivers are set up on the *Agvance Ops* tab under *Company Settings*.
- Tender Drivers are enabled on the *General* tab under *Personalize*.

Note: A SKY account cannot be assigned as both an Applicator and a Tender Driver on the same job.

Schedules

Selecting **Schedules** in SKY Dispatch shows jobs by Applicator with the ability to reorder and reassign jobs. Utilize the User Type drop-down to switch between Applicators and Tender Drivers.

Use the *Viewing* menu to switch between Blend and Delivery Tickets. Filter Applicators by using the *Filter*

Applicators field. Optionally select the *Condense Job Details* toggle to view less or more job information.

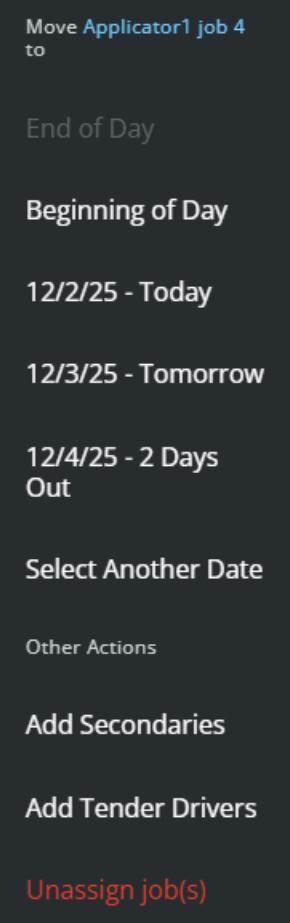

The screenshot displays a software interface for managing job orders. At the top, there is a header with a dropdown for 'User Type' set to 'Applicators', a 'Condense Job Details' toggle (which is turned on), and a 'Save Job Order' button. Below the header is a search bar labeled 'Filter Applicators' and a date range selector showing 'Today' and '12/2/25'. The main area is a grid of job assignments:

Applicator	Location	Assignee	Acres	Status
123ABC	House Place	Tester, Tommy	22 Acres	Green
Applicator1	Toms West of Home Field	Tester, Tommy	25 Acres	Red (locked)
	Barrys East of lane	Anderson, Barry	33.7 Acres	Red (locked)
	Behind Fred Anderson's House	Anderson, Barry	66.2 Acres	Yellow (warning)
	Tom's South of Town Field	Tester, Tommy	100 Acres	Green

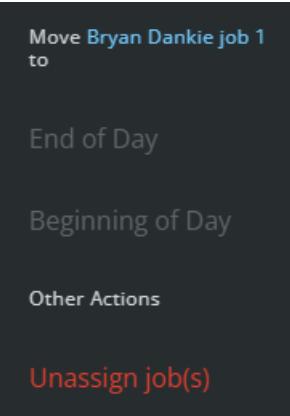

Below the grid, there is a 'User Type' dropdown menu with 'Applicators' selected (indicated by a checkmark) and 'Tender Drivers' listed below it. The 'Applicators' section shows details for '123ABC' with 22 assigned acres, and buttons for 'Select All' and 'Unassign All'. The 'Tender Drivers' section shows details for 'Applicator1' with 224.9 assigned acres, and buttons for 'Select All' and 'Unassign All'. A red box highlights the 'Applicators' section in the dropdown menu.

The schedule may also display indicators that show tender assignment details or availability.

- Right-clicking jobs in Applicators opens a menu with options to move the job to *End of Day*, *Beginning of Day*, *Tomorrow*, *2 Days Out*, *Select Another Date*, *Add Secondaries*, *Add Tender Drivers*, or to *Unassign job(s)*.

- Right-clicking jobs in *Tender Drivers* opens a menu with options to move the job to *End of Day*, *Beginning of Day*, or to *Unassign job(s)*.

Note: Jobs *In Process* cannot be reassigned.
