August 2026 Agvance SKY Release Notes

Last Modified on 11/03/2026 4:15 pm CST

Admin

- **SKYD-42 / User Roles** – Roles are now available in Agvance SKY Admin.
  - **Why** – This makes managing Users more efficient and straightforward.
  - **When/Where** – Roles are set up and maintained in Agvance SKY Admin under ***Users & Roles***.
  - **Action Needed** – No immediate action is required. However, generically named Roles were populated and can be modified as time allows.

Analytics

- **AN-3822 / Grain Audit Log Dashboard** – The Grain Audit Log dashboard provides an audit trail of changes made to various transactions.
  - **Why** – This gives the ability to review individual changes records and identify who made the changes, what was modified, and when.
  - **When/Where** – This dashboard is found under *Grain* in Analytics.
  - **Action Needed** – No action required.
- **AN-3817 / Product Lot Detail Dashboard** – The Product Lot Detail dashboard provides information including Quantity, Product Lot Attributes, and Values.
  - **Why** – This provides information related to Seed Lot Numbers and their Attributes.
  - **When/Where** – This dashboard is found under *Product* in Analytics.
  - **Action Needed** – No action required.
- **AN-3809 / AP Bill List Dashboard** – The AP Bill List dashboard provides a list of AP Bills broken down by Bill Location, Profit Center, Source, Account, and Cash Needs.
  - **Why** – This gives the ability to view a list of AP Bills.
  - **When/Where** – This dashboard is found under *Vendor* in Agvance SKY Analytics.
  - **Action Needed** – No action required.
- **AN-3656 / Restricted Use Pesticide Missouri** – A **Missouri** option is now available on the Restricted Use Pesticide dashboard.
  - **Why** – This allows those in Missouri to report specific information regarding commercial dealer and pesticide licenses.
  - **When/Where** – The Restricted Use Pesticide dashboard is found under *Agronomy* in Agvance SKY

Analytics.
    - **Action Needed** – No action required.

Customer

- **SKYW-4372 / Crop Year Filter** – The *Crop Year* is now available within the *Filters* panel rather than directly on the *Fields* page.
    - **Why** – This provides consistency as well as the ability to filter for multiple Crop Years.
    - **When/Where** – The *Fields* page is found in Agvance SKY Customer by selecting *Fields*, *Tanks*, ... from the left navigation.
    - **Action Needed** – No action required.
- **SKYW-4383 / Product Details Unit Price** – The Unit Price is now displayed on the *Product Details* page in Agvance SKY Customer.
    - **Why** – This provides additional helpful information and prevents the need to view the PDF.
    - **When/Where** – A *Unit Price* column is found on the *Product Details* page.
    - **Action Needed** – No action required.

Energy

- **SKYR-1183 / Address Autocomplete on Plot Tank Feature** – On the *Add/Edit Tank* page, when selecting **Plot Tank**, the *Zoom to Address* field returns the top 5 suggestions based on what is typed. Select from these suggestions to zoom the map to the relevant location. Will search US and Canada addresses only.
    - **Why** – The ability to autocomplete address searching in the *Zoom to Address* drop down.
    - **When / Where** – *Energy / Tanks / Add/Edit Tank / Plot Tank*
    - **Action Needed** – No action required.
- **SKYR-1214 / Address Autocomplete Agvance SKY Energy Map** – On the *Filters* panel of the *Agvance SKY Energy Map* page, the *Default City or Zip Code* field returns the top 5 suggestions based on what is typed. Select from these suggestions to zoom the map to the relevant location. Will search US and Canada addresses only.
    - Why – The ability to autocomplete address searching in the *Default City or Zip Code* search.
    - When/Where – *Agvance SKY Energy / Map / Filters*
    - Action Needed – No action required.
- **SKYR-1339,1340 / Energy Work Orders Tab** – *Energy Work Orders* tab has been added to the *Agvance SKY Energy Orders* page to view all Energy Work Orders. Selecting the **Ticket Number** link opens a detailed page for that work order.

    - **Why** – To view all energy work orders with details available in one location.
    - **When / Where** – *Agvance SKY Energy / Orders / Energy Work Orders*
    - **Action Needed** – No action required.
- **SKYR-1341 / Energy Work Order Detail Redirect** –Selecting an Energy Work Order **Ticket Number** from the *Route Management* grid opens a detailed view of the Energy Work Order in a new tab.
    - **Why** – To view all details of an Energy Work Orders from the *Route Management* grid.
    - **When / Where** – *Agvance SKY Energy / Route Management*
    - **Action Needed** – No action required.
- **SKYR-1345 / Last Job Order Number Not Recognized** – Upon saving the schedule, the last Job Order Number is recognized and no prompts display unless a Job Order Number is left blank.
    - Why – A prompt for missing Job Order Number displayed even though every row had a number.
    - **When / Where** – *Agvance SKY Energy / Route Management /* **+ Manage Job Schedule**.
    - **Action Needed** – No action required.

Grain

- **GRAIN-233 / Assembly Sheets** – Assembly Sheets can now be managed in Agvance SKY Grain.
    - **Why** – This gives the ability to add, edit, and delete Assembly Sheets within Agvance SKY.
    - **When/Where** – Assembly Sheets are found under *Inbound* in Grain.
    - **Action Needed** – The *Inbound - Assembly Sheets* User Role permission must be enabled in **Agvance SKY Admin**.

Mapping

Version 6.15

Web

- **HW-12400 / Agvance Integration Location List** – The Field setup and Send Rec to Blend/Plan workflows return Locations to which the Users have access in Agvance.
    - **Why** – Users could view Locations to which they had not been granted access.
    - **When/Where** – This was occurring in the Field setup and Send Rec to Blend/Plan workflows.
    - **Action Needed** – No action required.
- **HW-12466 / Export Data Planting Events** – Exporting Planting Events works as expected.
    - **Why** – An error was occurring.
    - **When/Where** – This occurred when exporting Planting Events 2019 and older.
    - **Action Needed** – No action required.
- **HW-12526 / Tillage Event Auto Import** – The *Tillage* Event Type was added to the *Auto Import Data Type*

drop-down. The new setup includes *Tillage Method* (defaults to Unspecified), *Depth* (defaults to one inch and supports zero values), *Monitor ID*, and *Implement* values. This also includes coverage data surface types for *Display Types* of *Point*, *Polygon*, and *Coverage*.

  - **Why** – This adds support for Tillage Events.
  - **When/Where** – The *Auto Import Data Type* drop-down is found under *Preferences*.
  - **Action Needed** – No action required.
- **HW-12578 / Send Rec to Blend/Plan Credit Checking** – Blends created are stopped or provide a warning because of credit limits or proper permits.
  - **Why** – This implements Agvance Warnings and Stops.
  - **When/Where** – This will occur during the Send Rec to Agvance Blend/Plan.
  - **Action Needed** – No action required.
- **HW-12618 / Defined Legends for Imported Harvest Events** – Predefined legend class breaks for Harvest Events are now available to allow User classification of this data. This includes surfacing of Owner Defined Legends when Surfacing Defaults are set with non-sampling Defined Legends and Change Layer properties for non-sampling Event Layers when Owner Defined Legends are selected.
  - **Why** – This enables Defined Legends for Harvest Events.
  - **Action Needed** – No action required.
- **HW-12665 / Equation Rec** – The rate and totals are the same as the initial Rec creation before closing, when opening a saved Rec, or when changing Product Units.
  - **Why** – There were inconsistencies in Product totals.
  - **When/Where** – This occurred before and after saving a Rec.
  - **Action Needed** – No action required.
- **HW-12666 / Planter Performance by Yield Prompt** – Planter Performance metrics were implemented based on Yield data. A prompt was added to the Analyze engine asking *How did planter performance impact yield?* with title *Planter Performance by Yield* for the batch zapper. The output compares Planting Event data to Harvest Event data and provides a summary. The following Attributes are analyzed:

Clean Furrow %	Furrow Moisture	Hex Shaft Error %	Proper Spacing %	Soil Moisture %
Coefficient of Variation	Furrow Quality %	Planting Depth ft.	Row Spacing	Spacing Variance %
Doubles % Down Force Margin	Good Ride %	Planting Depth	Singulation %	Speed
Down Force Weight	Ground Contact %	Population %	Skips %	Uniform Furrow

  - **Why** – This better optimizes planter equipment for web and mobile.
  - **When/Where** – This occurs post-Harvest.
  - **Action Needed** – No action required.

- **HW-12720 / Import Boundary** – The *Column Selection* boundary import supports file names with special characters as expected.
    - **Why** – File names with special characters were not previously supported.
    - **When/Where** – This is supported during the *Column Selection* boundary import.
    - **Action Needed** – No action required.

Version 6.14

Web

- **HW-110 / Template Manager** – Editing import Templates and selecting a new file has no impact on the file name. Additionally, when adding a new template, the *Template Name* remains blank.
    - **Why** – The name of Import Templates was being overwritten by the selected Template file.
    - **When/Where** – The *Template Manager* can be found under the *Setup* menu.
    - **Action Needed** – No action required.
- **HW-12252 / Non-Field Features Menu Options** – When a Non-Field Feature is selected within the map, all three context menu items (*Edit Feature*, *Add Sample*, *Delete Feature*) appear in the Map dialog window.
    - **Why** – This improves the editing workflow for Non-Field Features.
    - **When/Where** – The menu items appear when selecting Non-Field Features within the map.
    - **Action Needed** – No action required.
- **HW-12423 / Yield by Analysis** – Full support for manual Harvest Events is now available when creating the Yield by Analysis report.
    - **Why** – This enables the Yield by Analysis report when manual-only Events are present.
    - **When/Where** – The Yield by Analysis report is found under Reports.
    - **Action Needed** – No action required.
- **HW-12462 / Equation Rec** – The correct average rate value displays as expected on Equation Recs.
    - **Why** – Different rate averages were being displayed when switching between Product Types.
    - **When/Where** – This would occur when switching from dry to liquid and back to dry (or vice versa) Product Types.
    - **Action Needed** – No action required.
- **HW-12651 / Equation Rec to Event** – Long names can be used for blends and manure as expected.
    - **Why** – Converting an Equation Rec to an Event was resulting in an error.
    - **When/Where** – This occurred when using lengthy blend or manure names.
    - **Action Needed** – No action required.
- **HW-12712 / Template Manager Template Name** – Adding a *Template Name* to a Template works as expected. Additionally, Attributes can be added when adding a *Management Area - Manual Only* Template. Finally, some mini grids display their value as expected when first editing, including Import Attributes for

Nutrient Targets and on the Equation Setup Page and Product Type/Nutrient for Products in AgBytes.

- **Why** – This provides improvements to Agvance SKY Mapping.
- **Action Needed** – No action required.

Order

- **SKYD-1112 / Last Used Values** – Transactions remember last-used values in Agvance SKY Order.
  - **Why** – This gives the ability to efficiently add consecutive transactions without needing to choose those options each time.
  - **When/Where** – Some values are remembered when adding Blends, Plans, and Deliveries.
  - Action Needed – No action required.
- **SKYD-514 / Rate/Acre Calculator** – A Rate/Acre Calculator is now available when adding/editing Blends, Plans, and Templates in Agvance SKY Order.
  - **Why** – This gives the ability to calculate how much of a Product is needed based on the quantity of another Product or Product(s).
  - **When/Where** – The **Rate/Acre** Calculator is available on Blends, Plans, and Templates in the *Product* grid.
  - **Action Needed** – No action required.

Vendor

- **SV-2717 / Prior Year Bills Zip Attachments** – Attachments from multiple Prior Year AP Bills can be downloaded into a single zip file.
  - **Why** – This gives the ability to efficiently download multiple Bill attachments at once.
  - **When/Where** – When viewing the Prior Year Bills in Vendor, a **Batch Actions** button is now available download attachments from selected Bills.
  - **Action Needed** – No action required.
- **SV-2635 / Import CSV into AP Bill** – A CSV file can now be imported into an AP Bill in Agvance SKY Vendor.
  - **Why** – This makes entering AP Bills easier and more efficient.
  - **When/Where** – In the *Expense Breakdown & Predefined Split* section of **adding an AP Bill**, selecting **Import Data** gives the ability to import a single CSV file.
  - **Action Needed** – No action required.
